Art Unit: 2829

- 1. Applicants' Amendment filed August 9, 2004 presents distinct limitations now requiring restriction as follows:
- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 12-20, drawn to apparatus, classified in class 324, subclass 754.
 - II. Claim 21, drawn to apparatus, classified in class 324, subclass 754.
- 3. The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a plurality of electrical traces terminating on one end at the outer perimeter to a tester probe head and centrally located terminals electrically attached to a chip contact apparatus that is described in claim 21. The subcombination has separate utility such as an electrical test probe card not requiring the substrate formed of a material having a coefficient of thermal expansion similar to that of a semiconductor wafer as described in claim 1.

Application/Control Number: 09/905,426

Art Unit: 2829

4. Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art because of their recognized divergent subject

matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

A shortened statutory period for response to this action is set to expire one 6.

month(s) from the date of this letter. Failure to respond within the period for response

will cause the application to become abandoned. 35 U.S.C. 133

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Russell Kobert whose telephone number is (571) 272-

1963. The Examiner's Supervisor, Michael J. Tokar, can be reached at (571) 272-

1812. For an automated menu of Tech Center 2800 phone numbers call (571) 272-

2800.
